

## NUC8i5BEK - Dual-Core i5 Thin Chassis

### Who said small isn't powerful?

The Simply NUC8i5BEK is able to run multiple applications simultaneously including massive spreadsheets, documents, presentations, and any other small home or office needs you might have as well as streaming video, showing off slideshows, and even voice interaction using Cortana. All of this in a small 4" x 4" x 1.5" sized package which can mount behind your monitor or be unobtrusively located in plain sight due to its small size. And the active cooling system adjusts as needed to provide quiet during light loads where it isn't needed as much, and barely audible cooling when more is needed.

The Simply NUC8i5BEK is built with an 8th generation Intel® Core™ i5 processor to give you the performance to handle anything you throw at it, and it also has room for up to a 2TB HDD, or 4TB SSD so you have the room to store and backup all your files.

### New features let you use Windows® 10 to its full potential

The Simply NUC8i5BEK has some cool new features including dual-array front microphones so you can take advantage of Cortana's capabilities if you include Windows® 10 with no additional hardware needed. There's also a front power button and a multi-color LED so you can personalize the NUC with the look you want, along with 7.1 surround sound via HDMI or USB-C/DisplayPort to deeply immerse you in your content. You can also listen with headphones via the front microphone/audio jack. The choice is yours.

### Cut the cords, not the Performance

The Simply NUC8i5BEK comes with Intel® 802.11ac wireless, called Gigabit wireless, for connectivity right out-of-the-box. This makes it simple to immediately access files in the cloud, and with built-in Bluetooth 5, you can connect wireless peripherals like headsets and keyboards.
