Support Services and Manufacturer Warranties

Simply NUC, Inc. (“**Simply NUC**”) builds and sells computers and computer systems with quality components manufactured by major brands. In connection with those sales, we offer our customers Support Services (“**Services**”). These Services provide all Simply NUC customers with a streamlined post-sales support experience, as well as end-to-end management of the applicable Manufacturer Warranties (“**Warranties**” or “**Warranty**”) on the equipment we sell, which may vary in length and coverage for each individual component. When purchasing a product from Simply NUC, your Services and the Warranties from each manufacturer combine under Simply NUC to streamline the process of support, repair, and replacement. Components replaced under the Services may be new or refurbished. Refurbished components have been returned to Simply NUC, some of which were never used by a customer. All components are quality inspected and tested.

In the event that it becomes necessary to return a product purchased directly from Simply NUC, Simply NUC offers the ability to return eligible products for a credit or a refund, to be determined at the discretion of Simply NUC, of the purchase price paid less shipping and handling and any applicable restocking fees as outlined in the Simply NUC’s “U.S. Return and Refund Policy” document (<http://simplynuc.com/legal/>).

When we assemble products for customers, we perform a burn-in and functional test before shipping the products. This test detects most components that will fail in the first year prior to ever shipping the product to you. However, even after testing by the manufacturers and by us, there may be component defects that may not be detected until after shipping to you or created during shipping.

This document defines the obligations of Simply NUC and its customers in managing those failures.

If you elect to purchase any of the optional Support Services detailed above, you may do so by purchasing one of the available options that applies to your product at the time of purchase, or within 30 days of the system's ship date at a higher rate to be quoted by Simply NUC Sales. If your Services package extends beyond the Warranty period, and you have a claim after the applicable Warranty period, Simply NUC will replace the applicable product or component at our expense with identical or equivalent components. If you have a claim after a product or individual component is declared End of Life ("**EOL**") by its manufacturer at any time, Simply NUC will transfer working and compatible components to a recommended replacement product. If the manufacturer provides a credit for the defective, EOL product or component, the credit may be applied towards your replacement product. A balance may be due to Simply NUC.

For customers purchasing products who are planning on installing their own OS, we recommend ordering the product with either Linux (no charge) or Windows pre-installed to ensure that the system is fully stable with an OS installed by Simply NUC. Additionally, an OS restore key can be purchased to allow you to restore the OS or to verify that your OS install is the cause of issues by verifying them against a certified OS image. Simply NUC will provide links to drivers for Windows. The latest version of Linux should contain all necessary drivers, but limited support for various Linux is available. Many of Simply NUC's customers have installed VMWare ESXi, but Simply NUC does not offer it preinstalled and does not offer support for it. ESXi is a community supported OS, and forums should be consulted for assistance.

C. Terms Applicable To All Services

1. Services Process

- a. Initial Assessment: Some level of technical investigation and verification will be required prior to shipping any unit back to Simply NUC. This helps us to resolve problems that can be solved at your location without delay.
- b. Services Period: The Services period begins on the ship date of the applicable system. This date appears on the shipping label, tracking, and packing slip.
- c. Return Merchandise Authorization: Before returning a product to Simply NUC, you must first obtain a Return Merchandise Authorization ("**RMA**") by contacting our Customer Support team by visiting <http://simplynuc.com/support>. If you do not first obtain an RMA, our obligations with respect to that specific return will terminate, and you will be required to make payment for any shipping and will be responsible for any shipment losses.
- d. Shipping: Simply NUC will provide a return label at Simply NUC's expense for the first 30 days after the shipment of the product. After this 30-day period, you are responsible for shipping charges back to Simply NUC. Simply NUC will cover ground shipping charges back to you.
- e. Software Licenses: When a return involves a software license, such as Microsoft Windows, the product will need to be returned for repair or replacement, so that the license can be transferred to the new system, if possible. We do not do advance replacements (ship you a replacement item while you wait for your other item to be repaired or replaced), unless an advance replacement program was included in the original purchase, which may be at an additional cost.

Before providing a computer to Simply NUC or a Simply NUC certified technician for repair, Simply NUC strongly advises computer owners back up all data to a separate hard drive. Please remove any confidential, proprietary, or personal information and removable media such as floppy disk drives, CD's or PC cards. Furthermore, please remove all passwords on the operating system or BIOS so that a technician can access the system and perform repairs. Simply NUC is not responsible for lost or corrupted data, damage or removal of media as a result of the repair process. Although Simply NUC makes every effort to preserve data on a computer during the repair process, data loss may occur. As a result, it is the responsibility of the computer owner prior to sending the computer to Simply NUC, to back up all data onto a separate drive that is not part of the computer when it is sent in for service.
